

Teen Pregnancy Prevention – Primary Program (TPPP)

Illinois Department of Public Health (IDPH)

OVERVIEW
TPPP provides support for community-based planning to reduce teen pregnancy, sexually transmitted infections and the transmission of HIV.
WHO IS SERVED?
<i>Population(s)/Age Group:</i>
Adolescent girls and boys ages 10-18 and their parents/guardians in selected high need areas of the state are served by the program.
<i>Eligibility Criteria and Screening Tools:</i>
Information not available
HOW ARE SERVICES DELIVERED?
<i>Local Service System:</i>
Services are planned and provided by the local health departments and other community-based agencies, and delivered by schools and community-based organizations serving youth and/or parents.
<i>Referrals into Program:</i>
There is a public awareness component of the program that is optional. Public Awareness Campaigns are developed to address sexual behavior utilizing a purposeful promotional strategy to change knowledge, attitudes or behaviors in a specific, intended audience via marketing.
<i>Data Systems Used:</i>
